

# Shoulder and Elbow

Next Generation in Repair and Reconstruction | 2022

**Arthrex®** 

---

## Helping Surgeons Treat Their Patients Better™

---

Since its inception, Arthrex has been committed to one mission: Helping Surgeons Treat Their Patients Better. We are strategically focused on constant product innovation through scientific research, surgeon collaboration, and medical education to make less invasive surgical procedures simple, safer, and more reproducible. Each year, we develop more than 1,000 new innovative products and procedures to advance minimally invasive orthopedics worldwide.

Arthrex has always remained a privately held company, which allows for the rapid evaluation of new technologies and ideas and the freedom to develop products and techniques that truly make a difference. Our experienced team of dedicated professionals represents a shared passion and commitment to delivering uncompromising quality to the health care providers who use our products and the millions of patients whose lives we impact.

The medical significance of our contributions serves as our primary benchmark of success and will continue into the future as the legacy of Arthrex.

## SwiveLock® C Suture Anchor

This closed-eyelet, twist-in knotless anchor can be used as the lateral row of the SutureBridge™ repair. Additionally, it can be combined with FiberTape® suture for SpeedFix™ and SpeedBridge™ repairs. Knotless versions incorporate a knotless tensionable mechanism in the eyelet.

### Biocomposite

Product Description	Item Number
3.9 mm × 17.9 mm <b>(a)</b>	AR-2326BCC

4.75 mm BioComposite SwiveLock anchor preloaded w/ blue FiberTape Loop SCORPION-multifire needle	

Product Description	Item Number
<b>Required Instruments</b>	
Punch for 5.5 mm Corkscrew® FT and 4.75 mm and 5.5 mm SwiveLock Anchors	AR-1927PB
Punch for 3.9 mm SwiveLock Anchor	AR-2326P
<b>Optional Instruments</b>	
Punch/Tap for 5.5 mm Corkscrew FT and 5.5 mm SwiveLock Anchors	AR-1927CTB
Punch/Tap for 4.75 mm SwiveLock Anchors	AR-2324PTB
Disposable Punch for 5.5 mm Corkscrew FT and 4.75 mm and 5.5 mm SwiveLock Anchors	AR-1927PBS
Spade Tip Drill for 5.5 mm Corkscrew FT and 4.75 mm and 5.5 mm SwiveLock Anchors	AR-1927D
Punch/Tap for 3.9 mm SwiveLock Anchor	AR-2326PTB
Spade Tip Drill for 3.9 mm SwiveLock Anchor	AR-2326D

## SwiveLock® SP Suture Anchor

Eliminate the need for prepunching a bone socket with the SwiveLock SP (self-punching) anchor, which combines a titanium tip with a biocomposite, PEEK, or titanium anchor body. This self-punching design can help save valuable OR time, while increasing the precision of the final construct. Combine the SwiveLock® SP anchor with FiberTape® suture to complete a SpeedFix™ or SpeedBridge™ knotless rotator cuff repair.

### Biocomposite

FiberTape Suture Cutter w/ WishBone Handle	AR-13250W

## SpeedBridge™ Implant Systems

SpeedBridge implant systems are intended to facilitate a more convenient and efficient SpeedBridge repair. Implant systems are packaged in a single “peel-pack” blister and contain all SwiveLock implants and sutures required to perform a typical 4-anchor SpeedBridge repair. These systems are also available with the self-punching (SP) eyelet option.

### Implant Systems

Product Description	Item Number
<b>Knotless BioComposite SpeedBridge Implant System w/ SCORPION-multifire Needle</b>	<b>AR-2600SBS-10</b>
Two <b>4.75 mm</b> Knotless SwiveLock anchors w/ 1 preloaded FiberTape® Loop (1 blue, 1 white/black) for medial row Two <b>4.75 mm</b> Knotless SwiveLock anchors w/ #2 FiberWire® suture (blue) for lateral row Disposable punch <b>SCORPION-multifire needle</b>

## CuffMend™ Rotator Cuff Augmentation System

The CuffMend™ system provides an efficient, simplified approach for augmentation of partial- and full-thickness rotator cuff tears. The system employs the benefits of a 1 mm-thick ArthroFlex dermal allograft, which provides mechanical strength and supports healing.<sup>1,2</sup> The graft is introduced using the graft spreader and attached medially with the TissueTak™ tendon anchors for soft-tissue fixation to the rotator cuff tendon. This allows the augmentation to span the complete tendon length. PushLock® anchors are used, spanning the graft over the tuberosity footprint, for lateral bony fixation. Implantation of the CuffMend system is designed to be completed in <10 minutes of surgical time. Scientific literature supports the use of acellular dermal grafts as a safe and effective solution for rotator cuff augmentation.<sup>3</sup>

### Implants

Product Description	Item Number
TissueTak Tendon Anchor (each box contains 1 TissueTak device w/ 10 absorbable tendon anchors), qty 5	AR-19021TT
<b>CuffMend Implant System</b> Includes TissueTak Tendon Anchors, Graft Spreader, and two self-punching 3.5 mm BioComposite PushLock Anchors	AR-19041S*
BioComposite PushLock Anchor, 3.5 mm × 19.5 mm, self-punching PEEK eyelet	AR-1926BCSP*

## PASTA Bridge\Remplissage

Use this technique for transtendon repair of partial, articular-sided supraspinatus tendon avulsions, providing a secure bridging repair intended to enhance footprint compression and maximize contact between tendon and bone.

Product Description	Item Number
<b>PASTA Bridge Repair Implant System</b>	<b>AR-1934PRK</b>
Two 2.4 BioComposite SutureTak® anchors 4.75 mm BioComposite SwiveLock® anchor Disposable spear Disposable punch 17-ga spinal needle 1.1 mm nitinol guidewire Dilator	

## Knotless Corkscrew® Suture Anchor

The partially threaded Knotless Corkscrew anchor provides knotless soft-tissue fixation and has a tensionable suture-locking mechanism. Suture is passed and shuttled into the locking mechanism, allowing users to control the tension of knotless repairs. These anchors can be used for PASTA, remplissage, upper subscapularis, and SCR repairs.

### 3.9 mm Knotless Corkscrew Anchor

## 2.6 FiberTak® RC Soft Anchor

2.6 FiberTak RC soft anchors are specifically designed for surgeons who prefer an all-suture anchor for the medial row of a double-row, bridging rotator cuff repair. They are combined with knotless SwiveLock® C anchors for the lateral row. The unique 2.6 FiberTak RC anchor has a 1.7 FiberTape® suture fixed to the sheath so that it cannot slide, making it easy to tension the lateral row for a totally knotless construct. The 2.6 FiberTak RC anchor is available with a tensionable knotless mechanism or a sliding 1.3 mm SutureTape that can be incorporated into the repair, or discarded, for ultimate flexibility.

The self-punching inserter for select FiberTak anchors allows for direct insertion into bone without creating a prepunched or predrilled socket for anchor insertion. The self-punching FiberTak inserter may be used with or without a guide and can be placed directly into bone or used with a transtendon insertion technique.

Product Description	Item Number
With 1.7 mm TigerTape™ Loop (white/black) and 1.3 mm SutureTape (white/blue), self-punching, qty 5 <b>(a)</b>	AR-3652SP
With 1.7 mm FiberTape® Loop (blue) and 1.3 mm SutureTape (white/black), self-punching, qty 5	AR-3652TSP

<b>TransTendon Percutaneous Instrument Kit</b>	<b>AR-1941PK</b>
Includes 17-ga spinal needle, 1.5 mm nitinol wire, dilator, fishmouth spear, and punch for 3.9 mm Knotless Corkscrew anchor	

## PushLock® Suture Anchor

The unique knotless design allows tension to be adjusted intraoperatively while helping to ensure precise tissue reduction and fixation.

The self-punching anchor was developed to help speed completion of a SutureBridge™ repair. The titanium tip minimizes the need to prepare a bone socket for the lateral row, where soft tissue can sometimes obscure the view.

## Corkscrew® FT Suture Anchors

A fully threaded (FT) design over the entire length of the suture anchor provides cortical fixation. When inserting into hard bone, the internal drive mechanism substantially increases resistance to stripping. The recessed FiberWire® suture eyelet is self-aligning and minimizes suture abrasion during knot tying. The Corkscrew FT suture anchors are available in biocomposite (β-TCP and PLLA), PEEK, titanium, and bio materials.

## Knotless 1.8 FiberTak® Soft Anchor, Gen2

The Knotless 1.8 FiberTak soft anchor, Gen2 is the latest in knotless tensionable technology for instability. This design combines trusted knotless technology with the latest in suture innovation. The updates are aimed to improve implant insertion, improve handling characteristics, and provide premium instrumentation with additional stability.

Product Description	Item Number
<b>Knotless 1.8 FiberTak Soft Anchor, Gen2 w/ #2 suture, qty. 5</b>	<b>AR-3636</b>
<b>Disposables</b>

FiberTak® Anchor Glenoid Labrum Repair Surgical Technique	LT1-00021-EN

## PushLock® Suture Anchor

PushLock suture anchors are designed for simple and secure arthroscopic glenohumeral joint instability repair. This knotless technique saves valuable time and eliminates the possibility of knot impingement. The “suture first” technique allows suture to be passed independently through a desired amount of tissue prior to anchor implantation. Multiple suture configurations, including simple, cinch, and mattress stitches, can be accomplished with FiberWire®, FiberLink™, FiberStick™, and LabralTape™ sutures using the Labral Scorpion™ or QuickPass™ SutureLasso™ suture retriever. Tissue tension can be visualized and adjusted, if necessary, prior to final anchor implantation.

### 2.4 mm PushLock Anchor

Product Description	Item Number
Biocomposite, 2.4 mm × 11.3 mm <b>(a)</b>	AR-2922BC
PEEK, 2.4 mm × 11.3 mm <b>(b)</b>	AR-2922PS

PushLock® Knotless Instability Repair	LB1-0520-EN

## Labral SwiveLock® Suture Anchor

Screw-in, knotless SwiveLock anchors have been miniaturized to treat shoulder instability. Used like a labral PushLock anchor, this anchor offers all of the same knotless advantages (low-profile, quick, "suture-first" technique with multiple stitch configuration options) for surgeons who prefer a threaded anchor.

Product Description	Item Number
Biocomposite, 3.5 mm × 15.8 mm <b>(a)</b>	AR-2325BCC

#1 FiberWire Suture for 2.4 mm PushLock Anchor, 38 in (blue)	AR-7216

## SutureTak® Suture Anchor

SutureTak anchors are available in a variety of sizes, materials, and suture options. Biocomposite anchor options contain a molded-in suture to reinforce the strength of the anchor and suture eyelet. The nonabsorbable PEEK SutureTak anchor has a material eyelet that provides superior abrasion resistance due to PEEK's low coefficient of friction. Anchor insertion and delivery are made simple by drilling through a spear and inserting the anchor through the same spear into the drilled hole.

### 2 mm SutureTak Anchor

Product Description	Item Number
Biocomposite, 2 mm × 12 mm, w/ #1 FiberWire® suture <b>(a)</b>	AR-1934BCF-20

### Literature

Product Description	Item Number
Knotless SutureTak® Anchor Instability Repair Surgical Technique	<b>LT1-0511-EN</b>

## FASTak™ Suture Anchor

Titanium FASTak suture anchors come preloaded with #2 FiberWire® suture. In most cases, the implant can be manually inserted using the handled version. A drill is available for use in hard bone if desired.

Product Description	Item Number
2.8 mm × 11.7 mm, w/ #2 FiberWire suture and handle	AR-1324HF
2.8 mm × 11.7 mm, w/ #2 FiberWire suture	AR-1324SF
Drill for 2.8 mm FASTak II Anchor	AR-1324D

## Spears

Spears with removable trocar and V-shaped tips allow precise control and accurate anatomical placement of the suture anchors on the glenoid rim, in one simple step. The small-diameter shaft with trocar facilitates percutaneous anchor placement without using a cannula for SLAP repairs or a direct approach through the subscapularis.

Product Description	Item Number
Spear and Sharp and Blunt Obturators for 2.8 mm FASTak™ II, 3 mm SutureTak®, and 2.4 mm and 2.9 mm PushLock® Anchors	AR-1949
Disposable Spear and Sharp Obturator for 2.8 mm FASTak II, 3 mm SutureTak, 2.4 mm and 2.9 mm PushLock Anchors, single use	AR-1949S
Spear w/ Circumferential Teeth and Sharp Obturator for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock Anchors	AR-1946
Disposable Spear and Sharp Obturator for 2.4 mm FASTak, and 2.4 mm SutureTak Anchors, single use	AR-1945S
Spear and Sharp and Blunt Obturators for FiberTak®, 2.4 mm FASTak, and 2.4 mm SutureTak Anchors	AR-1948
Spear w/ Circumferential Teeth and Sharp Obturator for FiberTak, 2.4 mm FASTak, and 2.4 mm SutureTak Anchors	AR-1948CT
Fishmouth Spear for FiberTak and Knotless FiberTak Anchors	AR-3610F
Circumferential Teeth Spear for FiberTak and Knotless FiberTak Anchors	AR-3610CT
Curved Spear and Flexible Trocar for FiberTak and Knotless FiberTak Anchors	AR-3610CTC
Tight Curved Spear and Flexible Trocar for FiberTak and Knotless FiberTak Anchors (a)	AR-3610CTC-2
Slotted Spear for FiberTak and Knotless FiberTak Anchors (b)	AR-3610ST
Spear and Sharp Obturator for 3.5 mm PushLock and 3.5 mm SwiveLock Anchors (c)	AR-1907
Spear w/ Circumferential Teeth and Sharp Obturator for 3.5 mm PushLock and 3.5 mm SwiveLock Anchors (d)	AR-1906
Spear and Sharp and Blunt Obturators for 2 mm SutureTak Anchors	AR-1986
Slotted Spear w/ Dilator for 3.9 mm Knotless Corkscrew Anchor (e)	AR-1941DG
Fishmouth Spear w/ Dilator for 3.9 mm Knotless Corkscrew Anchor	AR-1941DGF
Circumferential Teeth Spear w/ Dilator for 3.9 mm Knotless Corkscrew Anchor	AR-1941CT
Angled Spear w/ Circumferential Teeth for FiberTak RC and 2.6 Anchors (f)	AR-3655

## Offset Guide

The offset guides allow surgeons to accurately position suture anchor implants on the glenoid for anatomic reconstruction of glenohumeral ligament structures during Bankart and SLAP repairs. All offset guides enable surgeons to easily reproduce a 1.5 mm medial offset position relative to the glenoid rim to complete an anatomic reconstruction of the labral tissue.

Product Description	Item Number
Offset Guide for 3.5 mm PushLock® and 3.5 mm SwiveLock® Anchors <b>(g)</b>	AR-1909R
Offset Guide for 2.8 mm FASTak™ II, 3 mm SutureTak®, and 2.4 mm and 2.9 mm PushLock® Anchors	AR-1934R
Offset Guide for FiberTak®, 2.4 mm FASTak, and 2.4 mm SutureTak Anchors	AR-1948R
Disposable Offset Guide for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock Anchors	AR-1934GS

## Cannulated Guide

Cannulated guides are designed for inserting anchors during open or arthroscopic Bankart repairs. These guides have a larger wall thickness than the spears to increase instrument strength; the guides also include a larger dovetail tip.

Product Description	Item Number
Cannulated Guide for 2.8 mm FASTak II, 3 mm SutureTak, and 2.4 mm and 2.9 mm PushLock Anchors	AR-1317

## FiberWire® and TigerWire® Sutures

FiberWire suture is constructed of a multistranded long chain ultra-high-molecular weight polyethylene (UHMWPE) core with a braided jacket of polyester and UHMWPE that gives FiberWire suture superior strength,<sup>1</sup> soft feel, and abrasion resistance<sup>2</sup> that is unequaled in orthopedic surgery. Suture breakage during knot tying is virtually eliminated, especially critical during arthroscopic procedures.<sup>3</sup>

Product Description	Item Number
#5 FiberWire Suture, 38 in (blue)	AR-7210
#5 FiberWire Suture, 38 in (blue) w/ conventional cutting needle, 48 mm, ½ circle	AR-7211
#5 FiberWire Suture, 38 in (1 blue, 1 white, 1 white/black) w/ conventional cutting needle, 48 mm, ½ circle	AR-7212
#5 FiberWire Suture, 38 in (blue) w/ conventional cutting needle, 48 mm, ½ circle, and tapered needle, 26.5 mm, ½ circle	AR-7213

0 FiberWire Suture, 38 in (blue) w/ diamond point needle, 22.2 mm, ½ circle	AR-7251
<b>FiberWire Suture Kit</b>	<b>AR-7219</b>
Includes four #5 FiberWire (blue), four #5 FiberWire (white), four #5 FiberWire (white/black), and six #2 FiberWire (blue) sutures w/ tapered needle and 3 free needles	

## Collagen-Coated FiberWire Suture

Collagen-coated FiberWire suture is coated with Type I bovine collagen, offering a softer coating and improved handling characteristics. These sutures are ideal for knotted and knotless repairs.

Product Description	Item Number
#2 FiberWire Suture, 38 in w/ tapered needle, 26.5 mm, ½ circle, collagen-coated	AR-7200B
#2 FiberLoop Suture w/ Straight Needle, 20 in (blue), 76 mm needle w/ 7 mm loop, collagen-coated	AR-7234B
FiberTape Suture, 2 mm, 7 in (blue) tape w/ each end tapered to #2 FiberWire suture, 30 in, collagen-coated	AR-7237-7B

## SutureTape Suture

SutureTape is a flat-braided suture that is similar in strength to #2 FiberWire® suture, but is 21% more resistant to tissue pull-through.<sup>1</sup> It offers improved handling and knot security and smaller comparable knot stacks.

Product Description	Item Number
SutureTape, 1.3 mm, 40 in (white/blue), w/ tapered ends and tapered needle, 26.5 mm, ½ circle <b>(b)</b>	AR-7500

## FiberTape® Suture

Ultra-high-strength 2 mm and 1.7 mm FiberTape sutures have a similar long-chain polyethylene structure as FiberWire suture. In addition to high-demand applications, like AC joint reconstruction, the broad footprint of FiberTape suture is ideal for repairs where tissue pull-through may be a concern.

Product Description	Item Number
FiberTape Suture, 2 mm, 36 in (blue), each end tapered to #2 FiberWire suture	AR-7237
FiberTape Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire suture <b>(d)</b>	AR-7237-7
FiberTape Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire suture, collagen-coated	AR-7237-7B
FiberTape Suture, 2 mm, 17 in (blue), each end tapered to #2 FiberWire suture w/ tapered needle 26.5 mm, ½ circle	AR-7237-17N
TigerTape™ Suture, 2 mm, 7 in (white/black), each end tapered to #2 FiberWire suture <b>(b)</b>	AR-7237-7T
FiberTape Suture, 1.7 mm, 36 in (blue), each end tapered to 0 FiberWire suture	AR-7273
TigerTape Suture, 1.7 mm, 36 in (white/black), each end tapered to 0 FiberWire suture	AR-7273T
FiberTape Suture, 1.7 mm, 8 in working length, 30 in overall (blue), each end tapered to 0 FiberWire suture <b>(c)</b>	AR-7273-8
TigerTape Suture, 1.7 mm, 8 in working length, 30 in overall (white/black), each end tapered to 0 FiberWire suture <b>(a)</b>	AR-7273-8T
FiberTape Suture, 1.7 mm, 17 in working length, 34 in overall (blue), each end tapered to 0 FiberWire w/ tapered needle 36.6 mm, ½ circle	AR-7273-17N
TigerTape Suture, 1.7 mm, 17 in working length, 34 in overall (white/black), each end tapered to 0 FiberWire w/ tapered needle 36.6 mm, ½ circle	AR-7273-17TN
FiberTape Loop, 2 mm, 8 in (blue), tapered to #2 FiberWire suture	AR-7275
TigerTape Loop, 2 mm, 8 in (white/black), tapered to #2 TigerWire suture	AR-7275T

## LabralTape™ Suture

This smooth, low-profile 1.5 mm specialty tape made from polyethylene, provides a wider footprint, and is 37% more resistant to tissue pull-through compared to a #2 suture.<sup>2</sup> LabralTape suture is ideal for the restoration of labral height in instability repairs.

Product Description	Item Number
LabralTape Suture, 1.5 mm, 36 in (white)	AR-7276
LabralTape Suture, 1.5 mm, 36 in (white/black)	AR-7276T

## FiberLink™ and TigerLink™ Suture

FiberLink suture is constructed from blue #2 suture and transitions from a single strand to an extended loop. This design is intended to allow 2 single strands of suture within a “cinch” stitch to gain purchase around tissue, while only managing one strand through the PushLock® anchor.

Product Description	Item Number
FiberLink Suture, #2 FiberWire suture w/ loop (blue) <b>(a)</b>	AR-7235
TigerLink Suture, #2 TigerWire suture w/ loop (white/black)	AR-7235T
FiberLink SutureTape, 1.3 mm, w/ loop (white/blue) <b>(b)</b>	AR-7535
TigerLink SutureTape, 1.3 mm, w/ loop (white/black)	AR-7535T
FiberLink SutureTape, 1.7 mm w/ loop (white/blue)	AR-7538
TigerLink SutureTape, 1.7 mm w/ loop (white/black)	AR-7538T

## FiberLoop® Suture

FiberLoop suture is a continuous loop of FiberWire suture with multiple needle options. The needles are easy to handle and move freely on the suture to recenter themselves after passing through tissue, facilitating even tension.

Product Description	Item Number
#2 FiberLoop® Suture, w/ straight needle, 20 in (blue), 76 mm needle w/ 7 mm loop <b>(a)</b>	AR-7234
#2 FiberLoop Suture, w/ straight needle, 20 in (blue), 76 mm needle, w/ 7 mm loop, collagen-coated	AR-7234B
#2 FiberLoop Suture, w/ straight needle, 20 in (white), 76 mm needle, w/ 7 mm loop	AR-7234-01
#2 TigerLoop™ Suture, w/ straight needle, 20 in w/ TigerWire suture (white/green), 76 mm needle, w/ 7 mm loop	AR-7234T
#2 FiberLoop Suture, w/ curved needle, 20 in (blue), ½ circle	AR-7234C
FiberLoop SutureTape, 1.3 mm, 20 in loop (white/blue) w/ 76 mm straight needle	AR-7534
TigerLoop SutureTape, 1.3 mm, 20 in loop (white/black) w/ 76 mm straight needle	AR-7534T
#2 FiberLoop Suture w/ FiberTag® Suture (blue), w/ 20 in FiberTape suture w/ straight needle	AR-7266
#2 FiberLoop Suture, w/ straight needle, 20 in (blue), 65 mm needle w/ 7 mm loop	AR-7284
0 FiberLoop Suture, w/ straight needle, 20 in (blue), 76 mm needle, w/ 7 mm loop	AR-7253
0 TigerLoop Suture, w/ straight needle, 20 in (white/green), 76 mm needle w/ 7 mm loop	AR-7253T

## FiberStick™ and TigerStick® Suture

The 12-in stiff “waxed” section of FiberStick suture allows convenient and easy advancement through most cannulated instruments, alleviating the need for a monofilament suture or wire suture shuttle. FiberStick sutures come with a thin plastic tube that helps protect the stiffened suture until use.

Product Description	Item Number
FiberStick Suture, #2 FiberWire® suture, 50 in (blue), one end stiffened, 12 in	AR-7209
TigerStick Suture, #2 TigerWire® suture, 50 in (white/black), one end stiffened, 12 in	AR-7209T
2-0 FiberStick Suture, 2-0 FiberWire suture, 50 in (blue), one end stiffened, 12 in	AR-7222

## FingerShield™ Finger Guard

Suture slides easily over the finger guard, a woven polyester sleeve with an embedded radiopaque blue marker. The finger guard will stand up to repetitive hand tying during a case without constraining the fingers.

Product Description	Item Number
FingerShield Finger Guard, 2/pk	AR-7199

## Free Needles

Product Description	Item Number
Reverse Cutting Needle w/ Nitinol Loop, C-13, 36.6 mm, ½ circle	AR-7280
Tapered Needle w/ Nitinol Loop, T-5, 26.5 mm, ½ circle	AR-7281
Spring Eye Needle, 60 mm	AR-7283

## FiberSnare® Suture

FiberSnare suture provides an easy one-step approach to creating a FiberWire loop on the tip of the tenodesis driver. FiberSnare suture can also be used as a suture shuttle for passage of traction sutures through bone tunnels.

Product Description	Item Number
#2 FiberSnare Suture, #2 FiberWire suture, 26 in (green) w/ ¾ in closed loop, 12 in stiffened	AR-7209SN

## FiberWire® Suture Cart

The cart is a great way to store and organize sutures in one convenient location, offers additional storage for miscellaneous items and is on wheels making it portable and easy to move around the facility.

Product Description	Item Number
FiberWire Suture Cart, cart only	AR-7200CART

## PassPort Button™ Cannula

PassPort Button cannulas help maximize visibility and maneuverability inside and outside of the arthroscopic workspace. The double-dam, one-piece, molded design has low-profile flanges that seat flush to the skin and soft tissue. The flanges are designed to create a stable portal that allows the insertion and removal of instruments while preventing cannula loss. The PassPort Button cannula with auxiliary lumen adds a convenient side channel for use with NanoScope™ instruments, or suture management. The Passport Divider also aids in suture management by creating divided channels in the 12 mm cannula.

They are easily introduced using the PassPort inserter or by grasping the inside flange with a curved hemostat and inserting into the incision. PassPort Button cannulas can be used for the shoulder, knee, hip, and elbow. Each cannula is supplied with a 5 mm spacer to ensure accurate length.

Product Description	Item Number
6 mm I.D. × 2 cm	AR-6592-06-20
6 mm I.D. × 3 cm	AR-6592-06-30

## Gemini™ SR8 Cannula

Gemini SR8 cannulas incorporate a deployable low-profile wing to help prevent cannula “fallout” while inserting and removing instruments during Bankart, SLAP, and rotator cuff repairs. Additionally, the cannula’s inner sleeve can telescope relative to the outer portion of the cannula, providing surgeons a clear, unobstructed channel to the pathology. A disposable cannulated obturator is included for easy insertion over a 2.6 mm switching stick.

Product Description	Item Number
Gemini Cannula, 8.25 mm × 9 cm	AR-6572
Switching Stick, 2.6 mm × 305 mm	AR-6572S

\*Gemini is a trademark of Frantz Medical Development Ltd.

## Expanula™ Cannula

Arthroscopic rotator cuff repair is easier with the Expanula cannula, which expands the workspace and view. Upon insertion, rotate its outer sheath to expand the distal end of the cannula beneath the deltoid. This design creates an extremely stable portal for inserting and removing instruments while preventing cannula loss. Each cannula is supplied with a “no-squirt” cap and disposable obturator.

Product Description	Item Number
Expanula Cannula, 8.25 mm I.D. × 7.5 cm	AR-6569

## Shoehorn Cannula

The Shoehorn Cannula has a longitudinal slot on top of the cannula for introducing oversized instruments. Each cannula is supplied with a disposable obturator.

Product Description	Item Number
Shoehorn Cannula, 6 mm I.D. × 9 cm	AR-6565

## Triple-Dam Twist-In™ Cannulas

This cannula's unique, 3-dam design allows instrumentation and implants to be passed arthroscopically. Additionally, it maintains pressurization for a clear visual fluid environment while minimizing squirting. The side port offers a luer lock connection and a valve switch for manual adjustment of fluid outflow and inflow.

Product Description	Item Number
Triple-Dam Twist-In Cannula, 8.25 mm I.D. × 7 cm	AR-6530TD
Triple-Dam Twist-In Cannula, 7 mm I.D. × 7 cm (a)	AR-6570TD
Triple-Dam Twist-In Cannula, 7 mm I.D. × 7 cm, no valve (b)	AR-6570TDNV
Triple-Dam Instrument Cannula, 7 mm I.D. × 7 cm (c)	AR-6550TD
Triple-Dam Twist-In Cannula, 6 mm I.D. × 7 cm	AR-6535TD

### Cannula Accessories

Product Description	Item Number
Reusable Obturator for AR-6530, AR-6530N, AR-6566 Twist-In Cannula	AR-6531
Reusable Obturator for AR-6535 Twist-In Cannula	AR-6536
Reusable Obturator for AR-6540, AR-6575-09 Twist-In Cannula	AR-6541
Reusable Obturator for AR-6545 Twist-In Cannula	AR-6546
Reusable Obturator for AR-6550, AR-6567, AR-6570, AR-6570F Twist-In Cannula	AR-6549
Reusable Obturator for AR-6560, AR-6562, AR-6564, AR-6560F Instrument Cannula	AR-6563
Wissinger Rod, 4 mm × 12.7 in	AR-3025
Extra Long Switching Stick, 4 mm × 12 in	AR-3026
Switching Stick Insert	AR-3027
Portal Dilation Set (4 mm, 6 mm, and 8 mm Dilators)	AR-6520
1.5 mm Pins for AR-6520, qty. 5	AR-6521

## Twist-In™ Cannulas

The translucent Twist-In cannula allows direct arthroscopic visualization of instruments and suture passing through the cannula. A flexible option easily conforms to large or curved instruments. Each cannula is supplied with a “no-squirt” cap and disposable obturator.

Product Description	Item Number
Twist-In Cannula, 8.25 mm I.D. × 7 cm, notched	AR-6530N
Twist-In Cannula, 8.25 mm I.D. × 7 cm	AR-6530
Twist-In Cannula, 8.25 mm I.D. × 9 cm	AR-6540
Twist-In Cannula, 7 mm I.D. × 7 cm (a)	AR-6570
Twist-In Cannula, 7 mm I.D. × 7 cm, flexible	AR-6570F
Twist-In Cannula, 6 mm I.D. × 7 cm	AR-6535
Twist-In Cannula, 6 mm I.D. × 9 cm	AR-6545
Partially Threaded Cannula, 8.25 mm I.D. × 7 cm	AR-6566
Partially Threaded Cannula, 8.25 mm I.D. × 9 cm	AR-6575-09
Partially Threaded Cannula, 8.25 mm I.D. × 11 cm	AR-6575-11
Partially Threaded Cannula, 7 mm I.D. × 7 cm (b)	AR-6567
Instrument Cannula, 5.5 mm I.D. × 9 cm	AR-6532
Instrument Cannula, 7 mm I.D. × 7 cm (c)	AR-6550

Crystal Cannula® Cannulas

The Crystal Cannula® cannula offers a unique barrel-shaped retention bowl that pools fluid to eliminate cannula “squirt.” Three atraumatic distal retaining options help to prevent cannula “fallout.” A flexible option easily conforms to large or curved instruments. Each cannula is supplied with a disposable orange obturator.

Product Description	Item Number
5.75 mm I.D. × 7 cm, distal ring	AR-6560
5.75 mm I.D. × 7 cm, smooth	AR-6562
5.75 mm I.D. × 7 cm, partially threaded	AR-6564
5.75 mm I.D. × 7 cm, flexible, distal ring	AR-6560F
5.75 mm I.D. × 5 cm, partially threaded, short	AR-6568

Low-Profile 5 mm Cannula

This 5 mm cannula is the lowest profile cannula on the market that allows for direct visualization of instruments and suture passing. The proximal portion of the cannula is similar to the Crystal Cannula cannula. Each cannula is supplied with a disposable blue obturator.

Product Description	Item Number
5 mm I.D. × 7 cm	AR-6548

SutureLasso™ Suture Passers

The SutureLasso SD suture passers feature a thumb pad and the QuickPass SutureLasso suture passers use thumbwheels to quickly and easily advance the supplied nitinol wire loop, a #2 FiberStick™ suture, or a monofilament (PDS) suture. The small, 1.8 mm-diameter tip provides atraumatic suture passage and is sterile for single-patient use, which ensures a sharp instrument every time.

ReelPass SutureLasso suture passers contain 10 yd of blue #1 nonabsorbable monofilament to provide a continuous supply without the need to reload. The ergonomic handle and thumbwheels were designed to easily advance the monofilament. This single-use device has a 1.5 mm-diameter tip that is the smallest on the market and is always sharp.

## Rotation Lasso Suture Passer

The Rotation Lasso suture passer features a rotating and steerable loop for arthroscopic and open soft-tissue repair. The simplicity of the design helps reduce procedural steps, prevents twists and tangles inside cannulas, and eliminates the need for outside suture shuttling.

Product Description	Item Number
Rotation Lasso Suture Passer, 90°	AR-6065-90

## Transosseous Suture Passer

The transosseous suture passer comes sterile and features a 6-inch malleable shaft, a durable nitinol capture loop, and a comfortable handle. Applications for this instrument include any passing of grafts or suture through bony sockets and tunnels.

Product Description	Item Number
Transosseous Suture Passer	AR-1000

## SutureLasso™ Suture Passer

These passers have various curved-tip configurations for arthroscopic Bankart, SLAP, and rotator cuff repairs. Each suture passer has a 2.3 mm outer diameter tip and comes preloaded with a nitinol loop to simplify shuttling and passing suture through tissue. The Banana SutureLasso® suture passer is designed for passing sutures through the rotator cuff via a superior, percutaneous approach (modified Neviaser portal) or along the acromial border.

Product Description	Item Number
Banana SutureLasso™ Suture Passer (a)	AR-4065B
45° w/ Wire Loop	AR-4065W
90° w/ Wire Loop	AR-4065-90W
45° Curve, left (b)	AR-4065-45L
45° Curve, right (c)	AR-4065-45R
45° w/ #2 Monofilament	AR-4065S
90° w/ #2 Monofilament	AR-4065-90S

## Micro SutureLasso™ Suture Passer

These 1.25 mm-diameter instruments work well for percutaneous suture passing during rotator cuff and glenoid labrum repairs.

Product Description	Item Number
Minor Bend (b)	AR-8701
Major Bend (a)	AR-8702
Straight (c)	AR-8703
Micro SutureLasso Retriever (d)	AR-8701SR

## FastPass Scorpion™ SL Suture Passer

The FastPass Scorpion SL suture passer simplifies antegrade suture passing by loading the suture from the side, preventing suture and soft tissue interference during suture passing. The low-profile design fits down a 6 mm cannula and the top jaw mechanism helps pass and retrieve FiberWire® sutures in one step.

Product Description	Item Number
FastPass Scorpion SL Suture Passer	AR-13999MF
SCORPION-multifire Needle	AR-13995N

## SCORPION-multifire Suture Passer

With the FastPass SCORPION-multifire suture passer, surgeons can load 2 sutures outside and independently pass 2 sutures inside. The low-profile designs of the humpback and straight suture passers fit down 7 mm and 6 mm cannulas, respectively. The FastPass upper jaw helps pass and retrieve FiberWire suture in one step.

Product Description	Item Number
FastPass SCORPION-multifire Suture Passer (a)	AR-13997MF
SCORPION-multifire Suture Passer, humpback (b)	AR-13995
SCORPION-multifire Suture Passer, straight (c)	AR-13996
SCORPION-multifire Needle	AR-13995N

## Scorpion™ Suture Passer

The FastPass Scorpion™ suture passer grasps cuff tissue then directly passes and retrieves FiberWire suture. Scorpion suture passers grasp 16 mm of tissue and fit through a 6 mm cannula. A “humpback” version is available for use in thicker rotator cuff tissue and requires a 7 mm cannula.

Product Description	Item Number
FastPass Scorpion Suture Passer <b>(a)</b>	AR-13997SF
Scorpion Suture Passer <b>(b)</b>	AR-13990
Scorpion Suture Passer, humpback <b>(c)</b>	AR-13993
Scorpion Needle	AR-13990N
SureFire® Scorpion Needle	AR-13991N

## Labral Scorpion Suture Passer

Pass and retrieve #2 FiberWire suture in the labrum using the Labral Scorpion QL suture passer. Its quickloading bottom jaw and suture-retrieving top jaw are designed for simplicity and easy use, supporting more successful suture passes. The Labral Scorpion suture passer’s streamlined, low-profile jaws are designed to maneuver around the glenohumeral space and fit through a 6 mm cannula. Use the Labral Scorpion suture passer through a single portal to self-retrieve sutures with the upper jaw’s capturing mechanism.

Product Description	Item Number
Labral Scorpion QL Suture Passer	AR-13998QL
SCORPION-multifire Needle	AR-13995N

The Labral Scorpion QL suture passer is ONLY compatible with the SCORPION-multifire needle.

Product Description	Item Number
Labral Scorpion Suture Passer	AR-13998
SureFire Scorpion Needle	AR-13991N

The Labral Scorpion suture passer is ONLY compatible with the SureFire Scorpion needle.

## BirdBeak® Suture Passer

BirdBeak suture passers have an extremely sharp tip to penetrate soft tissue easily and a stiff shaft that resists bending during tissue-shifting procedures. BirdBeak suture retriever devices are an essential tool for arthroscopic labral, SLAP, and rotator cuff repairs. The BirdBeak Evolution suture passer has a uniquely designed handle that allows for easy operation from virtually any hand position.

Product Description	Item Number
BirdBeak Suture Passer, 45° up tip <b>(d)</b>	AR-11800
BirdBeak Suture Passer, 22° up tip <b>(c)</b>	AR-11890
BirdBeak Suture Passer, straight <b>(b)</b>	AR-11880
BirdBeak Suture Passer, straight, w/ 45° handle, left	AR-11887
BirdBeak Suture Passer, straight, w/ 45° handle, right	AR-11886
BirdBeak Evolution Suture Passer, 45° up tip	AR-11800E
BirdBeak Evolution Suture Passer, 22° up tip	AR-11890E
BirdBeak Evolution Suture Passer, straight	AR-11880E
BirdBeak Evolution Suture Passer, 15° up curve <b>(a)</b>	AR-11881E
Banana BirdBeak Evolution Suture Passer, 22° up tip	AR-11892E
Grasping BirdBeak Suture Passer, 22° up curve w/ SR handle <b>(f)</b>	AR-11810SR

### Inverted BirdBeaks

Product Description	Item Number
BirdBeak Suture Passer, 45° up tip, inverted jaw w/ WishBone™ handle <b>(e)</b>	AR-11805W
BirdBeak Suture Passer, 22° up tip, inverted jaw w/ WishBone handle	AR-11895W

## Rhino Suture Passers

Rhino suture passers have an extremely sharp, small-diameter upturned tip that will easily penetrate soft tissue. The ridged 3.4 mm shaft resists bending and flexing during tissue-shifting procedures. The novel bottom opening jaw design is conveniently positioned to capture the suture from an anchor, eliminating the need to rotate the instrument.

Product Description	Item Number
Straight <b>(a)</b>	AR-11850SR
Left Curve <b>(c)</b>	AR-11852SR
Right Curve <b>(b)</b>	AR-11851SR
Straight, w/ WishBone handle	AR-11850W
Left Curve, w/ WishBone handle	AR-11852W
Right Curve, w/ WishBone handle	AR-11851W

## Penetrator™ Suture Retriever

This unique instrument combines a small penetrating tip with a suture grasper to allow suture delivery or extraction in one step. The 2.7 mm-diameter tip slides easily through the tissue with the suture either sliding or grasped within the self-ratcheting mechanism. This device is ideal for instability and rotator cuff repairs.

Product Description	Item Number
Penetrator Suture Retriever, 15° up curved	AR-2167-2
Penetrator Suture Retriever, straight (a)	AR-2167ST-2
Penetrator FiberTape® Suture Retriever, 15° up curved	AR-2167-3
Penetrator FiberTape Suture Retriever, straight (b)	AR-2167ST-3
Penetrator FiberTape Suture Retriever, 15° up curved w/ WishBone™ handle	AR-2167W-3
Penetrator FiberTape Suture Retriever, straight w/ WishBone handle	AR-2167STW-3

## Suture Retriever

The suture retriever is designed for atraumatic suture retrieval and manipulation during arthroscopic procedures. The jaws create a closed loop that allows suture to slide freely during suture extraction. The uniquely designed tip is made to spread parallel strands of suture and facilitate retrieval. Its small diameter and low profile allow access into the tightest joint spaces. The tip angle on the 45° suture retriever allows access to suture strands in deep, hard-to-reach spaces.

Product Description	Item Number
Suture Retriever, 3.4 mm, straight (a)	AR-12540
Suture Retriever, 3.4 mm, 15° up	AR-12550
Suture Retriever, 3.4 mm, 45° right (b)	AR-12580
Suture Retriever, 3.4 mm, 45° left	AR-12590
Suture Retriever w/ WishBone™ Handle, 3.4 mm, straight	AR-12540W
Suture Retriever w/ WishBone Handle, 3.4 mm, 15° up	AR-12550W
Suture Retriever w/ WishBone Handle, 3.4 mm, 45° left	AR-12590W
Suture Retriever w/ WishBone Handle, 3.4 mm, 45° right	AR-12580W

## FiberTape® Retriever

The FiberTape Retriever has a wide jaw specifically designed for easy FiberTape suture management during a SpeedBridge™ or SpeedFix™ repairs. The serrated tip also allows the grasper to be used to securely grab sutures.

Product Description	Item Number
FiberTape Retriever w/ SR Handle <b>(a)</b>	AR- <b>13974SR</b>
FiberTape Retriever w/ NR Handle	AR- <b>13974NR</b>
FiberTape Retriever w/ WishBone™ Handle	AR- <b>13974W</b>

Product Description	Item Number
Mini FiberTape Retriever w/ SR Handle <b>(b)</b>	AR- <b>12974SR</b>
Mini FiberTape Retriever w/ NR Handle	AR- <b>12974NR</b>
Mini FiberTape Retriever w/ WishBone Handle	AR- <b>12974W</b>

The Mini FiberTape Retriever is designed for use with LabralTape™ suture.

## KingFisher® Retriever/Grasper

Perform multiple tasks and improve procedural speed and efficiency with KingFisher suture retriever and tissue grasper. The 4.2 mm tip design is optimal for arthroscopic tissue grasping/reduction, foreign body removal, and suture retrieval/management.

Product Description	Item Number
KingFisher Retriever/Grasper w/ SR Handle <b>(a)</b>	AR- <b>13970SR</b>
KingFisher Retriever/Grasper w/ NR Handle	AR- <b>13970NR</b>
KingFisher Retriever/Grasper w/ WishBone™ Handle	AR- <b>13970W</b>

Product Description	Item Number
KingFisher FiberTape Retriever/Grasper w/ SR Handle <b>(b)</b>	AR- <b>13971SR</b>
KingFisher FiberTape Retriever/Grasper w/ NR Handle	AR- <b>13971NR</b>
KingFisher FiberTape Retriever/Grasper w/ WishBone Handle	AR- <b>13971W</b>

Rotator Cuff Grasper

The low-profile 4 mm tip was specifically designed to securely grasp the tendon and pull it into the proper anatomic position. This instrument also features an ergonomic ring handle with a tip-locking mechanism.

Product Description	Item Number
Rotator Cuff Grasper w/ SR Handle	AR-13960SR
Rotator Cuff Grasper w/ NR Handle	AR-13960NR
Rotator Cuff Grasper w/ WishBone Handle	AR-13960W

FiberWire® Grasper

The FiberWire grasper is designed to grasp and retrieve multiple strands of FiberWire suture. This fully toothed design and long jaw assembly provides a substantial working range for easily grabbing suture within the glenohumeral or subacromial joint space.

Product Description	Item Number
FiberWire Grasper w/ NR Handle	AR-13975NR
FiberWire Grasper w/ SR Handle	AR-13975SR
FiberWire Grasper w/ WishBone™ Handle	AR-13975W

## Back Grasper

The back grasper is a simple but effective tool to aide introducing grafts, implants, and instruments into the body.

Product Description	Item Number
Back Grasper w/ NR Handle	AR-12531NR
Back Grasper w/ SR Handle	AR-12531SR
Back Grasper w/ WishBone Handle	AR-12531W

## Crochet Hook

The crochet hook is a simple tool that performs well in tight spaces to retrieve suture loops during arthroscopic Bankart, SLAP, and rotator cuff repairs, or any suturing procedure. The smooth tip prevents abrasion of suture strands and the ergonomic, knurled handle facilitates instrument manipulation in the wet arthroscopic environment. The push/pull crochet hook was designed to push suture knots and/or retrieve suture with the same instrument.

Product Description	Item Number
Crochet Hook (a)	AR-5008H
Push/Pull Crochet Hook (b)	AR-5009H
Suture Hook (c)	AR-5007H

## SCR Guide

The SCR Guide helps simply and reproducibly estimate the distances between suture anchors during Superior Capsular Reconstruction (SCR). This reusable hand instrument's suture-retrieving jaw is designed for both suture and FiberTape suture. The highlighted black sleeve clearly shows graduations for distances referenced off of sutures.

Product Description	Item Number
SCR Guide	AR-16950SR

## Suture Cutters

The suture cutter was designed to facilitate arthroscopic cutting of FiberWire® and braided sutures. The uniquely designed cutting jaws remain sharp throughout repeated use. The suture cutter is available in a closed and open end, left notch version. The closed-end suture cutter allows the surgeon to leave a 3 mm suture tail without the possibility of cutting the knot. The open end, left notch version facilitates suture cutting inside the joint without having to top load the cutter. The FiberTape® cutter was designed to allow for flush cutting of 2 FiberTape sutures.

Product Description	Item Number
Suture Cutter, 4.2 mm, straight (used w/ #2 and #5 suture) <b>(a)</b>	AR-12250
Suture Cutter, 4.2 mm, closed-end w/ WishBone™ Handle, straight	AR-12250W
Suture Cutter, 4.2 mm, open end, left notch (used w/ all suture) <b>(b)</b>	AR-11794L
Suture Cutter, 4.2 mm, w/ WishBone Handle, open end, left notch (used w/ all suture)	AR-11794LW
Mini Suture Cutter, 3.4 mm, straight (used w/ #2 FiberWire and LabralTape sutures)	AR-13255
Mini Suture Cutter, 3.4 mm, straight w/ WishBone Handle (used w/ #2 FiberWire and LabralTape sutures)	AR-13255W
FiberWire Scissor (for open procedures) <b>(c)</b>	AR-11796
FiberTape Cutter	AR-13250
FiberTape Cutter w/ WishBone Handle	AR-13250W

## CrabClaw™ Knot Pusher/Suture Retriever

The opening rotary jaw of the CrabClaw instrument makes it an effective suture retriever and knot pusher. It allows for intra-articular capture of suture, which dramatically simplifies arthroscopic knot tying. Suture posts are alternated simply by opening the jaws and engaging the parallel suture limb outside the cannula or in the joint. When used as a knot pusher, the ratcheting handle secures the jaw in a closed position to allow for smooth knot advancement.

Product Description	Item Number
CrabClaw Knot Pusher/Suture Retriever	AR-12960

## 6th Finger™ Knot Pusher

The unique double-tube design allows surgeons to apply and maintain tension to the first throw, while advancing subsequent throws with the sliding plastic outer tube. The inner tube allows subsequent “past pointing” to apply opposite suture tension to the knot similar to open knot tying techniques. A wire loop is incorporated inside the disposable, sterile 6th Finger knot pusher for easy suture loading.

Product Description	Item Number
6th Finger Knot Pusher w/ Suture Passer, sterile, 5/box	AR-1930S

## Knot Pusher

The single-hole knot pusher provides a simple method for advancing sliding knots and half-hitches. The closed-end knot pusher has a modified handle that provides an ergonomic feel. The distal tip has also been modified for easier advancement of slip knots and half-hitches.

Product Description	Item Number
Knot Pusher, closed end (a)	AR-1305
Single-Hole Knot Pusher	AR-1299

## Probes

With the articulating probe, surgeons can easily insert an instrument through a small stab incision in soft tissue with the tip in a straight position. The tip of the probe can then be changed to a locked 90° position to test the strength of a soft tissue repair or to probe defects.

Product Description	Item Number
Articulating Probe (a)	AR-10100
Hook Probe, 5.4 mm (b)	AR-10000
Hook Probe, 3.4 mm (c)	AR-10010

## Curettes

Ring curettes are available with one or both sides cut. D-curettes feature a D-shaped, dual-sided cutting ring designed to prepare the articular margin prior to anchor insertion during rotator cuff repair. D-curettes are also an excellent choice for cartilage removal, particularly prior to glenoid placement in total shoulder arthroplasty procedures.

Product Description	Item Number
D-curette, 5.4 mm × 150 mm, both sides cut (a)	AR-22020
D-curette, 3.4 mm × 150 mm, both sides cut	AR-23020
Curette, 5.4 mm ring, one side cut (b)	AR-20010
Curette, 5.4 mm ring, both sides cut	AR-20020

## Modular Soft-Tissue Retractor

The modular soft-tissue retractor is a versatile adjunct to muscle-splitting approaches about the shoulder, including mini-open rotator cuff repair. It has a self-locking and self-retaining design with modular paddles that allow firm, yet safe, exposure. Its self-locking design allows the shoulder to be moved throughout a range of motion without the retractor becoming dislodged.

Product Description	Item Number
Modular Soft-Tissue Retractor Body	AR-8170
Modular Soft-Tissue Retractor Set	AR-8170S
Modular Soft-Tissue Retractor Atraumatic Set	AR-8170DS
Modular Soft-Tissue Retractor Atraumatic Paddle Set, 75 mm	AR-8170-75DS
Replacement paddles are available for all sets	

Product Description	Item Number
Modular Retractor Paddles - Atraumatic	
50 mm, left	AR-8170-50DL
50 mm, right	AR-8170-50DR
75 mm, left	AR-8170-75DL
75 mm, right	AR-8170-75DR

## Tissue Elevator and Bone Preparation System

The Tissue Elevator and Bone Preparation System combines new tip designs and a modular handle to give you the ultimate selection of tools for work in the glenohumeral joint and subacromial space. A variety of rasps, curettes, tissue elevators, and a chondro pick are provided in one convenient system. The shaft length of each tip is long enough to effectively span the distance from an anterior working portal to the posterior rim of the glenoid, allowing the best possible angle of approach to work with ease and efficiency in this area.

Product Description	Item Number
<b>Tissue Elevator Instrument Set includes</b>	<b>AR-1344S</b>
Quick Connect Handle, ¼ sq. nonratcheting	AR-2003NR
Tissue Elevator Instrument Case	AR-1344C
<b>Attachment Options</b>	
Tissue Elevator, 15° down <b>(a)</b>	AR-1344-15

## Shoulder Repair Set

The Shoulder Repair Set, which contains the most popular instruments as determined by leading upper extremity surgeons, is a comprehensive selection of specialty instruments for facilitating arthroscopic shoulder repairs. Efficiently manage most anatomical variations with an array of arthroscopic suturing instruments. Ease portal dilation and cannula insertion with cannulated obturators. The autoclavable, anodized aluminum case also includes a custom, removable rack for suturing instruments and cannulated obturators.

Product Description	Item Number
<b>Shoulder Repair Set (a) includes</b>	<b>AR-8402S</b>
Hook Probe, 5.4 mm	AR-10000
BirdBeak Suture Passer, 45° up tip, 2.75 mm	AR-11800
BirdBeak Suture Passer, 22° up tip, 2.75 mm	AR-11890
Suture Retriever, 3.4 mm, straight	AR-12540
Shoulder Debridement Rasp, 30° angle	AR-1282L
Knot Pusher, closed end	AR-1305
SLAP Rasp, 15° tip	AR-1309
Glenoid Rasp, 20° tip	AR-1312
Bankart Rasp, 90° tip	AR-1312-90

## Loop 'N' Tack™ Biceps Tenodesis

The Loop 'N' Tack technique is a simple approach to arthroscopic biceps tenodesis. The technique allows for suture to be passed and retrieved under direct visualization through the biceps tendon while still attached to the superior labrum. The biceps can be fixated to the tuberosity or incorporated into a rotator cuff repair.

Product Description	Item Number
<b>4.75 Knotless BC Loop 'N' Tack Tenodesis Implant System</b> Includes 4.75 mm × 19.1 mm BioComposite Knotless SwiveLock® anchor, punch, Loop 'N' Tack SwiftStitch™ passer, and FiberLink™ SutureTape	AR-1665KBCSL
<b>4.75 BC Loop 'N' Tack Tenodesis Implant System</b> Includes 4.75 mm × 19.1 mm BioComposite SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCSL
<b>3.9 BC Loop 'N' Tack Tenodesis Implant System</b> Includes 3.9 mm × 17.9 mm BioComposite SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCSL-39
<b>2.9 BC Loop 'N' Tack Tenodesis Implant System</b> Includes 2.9 mm × 12.5 mm BioComposite Short PushLock® anchor, spear, trocar, drill, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665BCPL
<b>4.75 Knotless PEEK Loop 'N' Tack Tenodesis Implant System</b> Includes 4.75 mm × 19.1 mm Knotless PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665KPSL
<b>4.75 PEEK Loop 'N' Tack Tenodesis Implant System</b> Includes 4.75 mm × 19.1 mm PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PSL
<b>3.9 PEEK Loop 'N' Tack Tenodesis Implant System</b> Includes 3.9 mm × 17.9 mm PEEK SwiveLock anchor, punch, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PSL-39
<b>2.9 PEEK Loop 'N' Tack Tenodesis Implant System</b> Includes 2.9 mm × 12.5 mm PEEK Short PushLock anchor, spear, trocar, drill, Loop 'N' Tack SwiftStitch passer, and FiberLink SutureTape	AR-1665PPL
Loop 'N' Tack SwiftStitch Passer	AR-4068LNT

## 2.6 FiberTak® Button

The FiberTak button is an all-suture button that can be used for both bicortical and unicortical tension slide tenodesis techniques. The button is a reinforced 2.6 mm diameter sheath preloaded with two 2-0 FiberLinks that are used to shuttle the whipstitch limbs through the sheath.

Product Description	Item Number
<b>2.6 FiberTak Button Implant System</b> Includes FiberTak button w/ inserter and double loaded FiberLink, 2.6 mm spade tip drill, drill guide, #2 FiberLoop® suture, and free needle	AR-3680
2.6 FiberTak Button	AR-3681
2.6 mm Spade-Tip Drill, sterile	AR-3682

## Knotless TensionTight™ Implant System

The TensionTight button is used to perform a knotless onlay biceps tenodesis, using either an arthroscopic suprapectoral or open subpectoral approach. A locking jaw in the button allows for a knotless biceps tenodesis. Securing the biceps tendon repair with a Loop 'N' Tack™ stitch enables an all-arthroscopic suprapec onlay tenodesis.

Product Description	Item Number
<b>Knotless TensionTight Button Implant System</b> Includes Knotless TensionTight Button with inserter, two #5 FiberLink sutures, 3.7 mm drill pin, curved needle with nitinol loop, and shoehorn cannula	<b>AR-2350</b>

## Distal and Subpectoral Biceps Repair

The tension-slide technique with the BicepsButton™ implant system provides surgeons a simple, reproducible, and biomechanically stable distal and proximal biceps repair. This “tensioning” technique draws the tendon against the distal cortex of the bone socket. A tenodesis screw can be added to augment the repair and place the tendon in a more anatomic position.

Product Description	Item Number
<b>Distal Biceps Repair Implant Kit</b> Includes BicepsButton implant, button inserter, FiberLoop® suture, 7 mm × 10 mm PEEK tenodesis screw, and BicepsButton drill pin	AR-2260
<b>BioComposite Distal Biceps Implant Kit</b> Includes BicepsButton implant, button inserter, FiberLoop suture, 7 mm × 10 mm biocomposite tenodesis screw, disposable tenodesis driver, BicepsButton drill pin, suture passing wire, and free needle	AR-2260BC
BicepsButton Implant, 2.6 mm × 12 mm	AR-2261
<b>Knotless Distal Biceps Implant Kit</b> Includes Knotless BicepsButton implant, button inserter, BicepsButton drill pin, FiberTape® Loop, FiberLoop suture, and curved free needle	AR-2280
Knotless BicepsButton Implant, 2.6 mm × 12 mm	AR-2281
FiberTape Loop, 2 mm, (blue)	AR-7275
#2 FiberLoop® Suture w/ Straight Needle	AR-7234
PEEK Tenodesis Screw, 7 mm × 10 mm	AR-1670PS
<b>Required Instruments</b>	
<b>Tenodesis Screw System includes</b>	AR-1675S
Driver for Tenodesis Screws	AR-1670DB
Tear Drop Handle w/ Suture Cleat	AR-2001BT
Headed Reamer, 8 mm, cannulated	AR-1408
<b>Required Disposables</b>	
Button Inserter	AR-2262
BicepsButton Drill Pin, 3.2 mm, sterile	AR-2263
Tapered Needle w/ Nitinol Loop, 26.5 mm, ½ circle	AR-7281
Nitinol Suture-Passing Wire	AR-1255-18
<b>Optional Disposables</b>	
Low-Profile Reamer, 8 mm	AR-1408LP

Distal Biceps Repair Surgical Technique	LT1-0592-EN
Subpectoral Biceps Tenodesis Surgical Technique	LT1-0591-EN

## Proximal Tenodesis Button

The proximal tenodesis button has an angled face to promote a toggle effect when the button contacts the far cortex, making it ideal for unicortical biceps tenodesis.

Product Description	Item Number
<b>Proximal Tenodesis Implant Kit</b> Includes Proximal BicepsButton implant, button inserter, FiberLoop suture, free needles, drill pin, and a shoehorn cannula	AR-2290
Proximal Tenodesis Button, 2.6 mm × 8.5 mm, w/ inserter	AR-2291
#2 FiberLoop® Suture (blue) w/ Straight Needle	AR-7234
Tapered Needle w/ Nitinol Loop, 26.5 mm, ½ circle	AR-7281
Drill Pin, 3.2 mm, sterile	AR-2263
Shoehorn Cannula	AR-6565

## Two-Incision Distal Biceps Implant System

The Two-Incision Distal Biceps Implant System provides everything required to perform a distal biceps repair from a posterior approach using two 7 mm unicortical buttons.

Product Description	Item Number
<b>Two-Incision Distal Biceps implant System</b> Includes two 2.6 mm × 7 mm buttons w/ inserters, two #2 FiberWire® w/ needles (1 blue/white, 1 black/white) 3.2 mm drill pin, flexible obturator, and curved obturator w/ nitinol wire	<b>AR-2295</b>
Two-Incision Tenodesis Button, 2.6 mm × 7 mm	<b>AR-2296</b>
Curved Obturator, cannulated, 3 mm	<b>AR-2294</b>

## Birmingham Biceps™ Implant System

The Birmingham Biceps implant system for subpectoral tenodesis was designed to minimize the potential for postoperative humeral fractures by placing a small 5.5 mm PEEK SwiveLock® tenodesis implant near the top of the pectoralis at a newly defined anatomical landmark, the pallium pectoralis. The implant system includes everything needed for the procedure, making it very convenient for surgeon and staff.

Product Description	Item Number
<b>Birmingham Biceps Implant Kit</b> Includes 5.5 mm PEEK SwiveLock anchor, FiberLink™ Plus suture, free needle, 5.5 mm pilot-headed reamer, and 5.8 mm tap	<b>AR-1662S-1</b>

## Pec Button

The pec button and large pec button have an angled face to promote a toggle effect when the button contacts the opposite cortex, making these buttons ideally suited for unicortical repairs, particularly pectoralis major injuries. The large pec button features larger eyelets to accommodate FiberTape® and #5 FiberWire sutures.

Product Description	Item Number
<b>Pec Button Implant Repair Kit</b> Includes 3 pec buttons w/ FiberWire suture and needles, button inserter, and 3.2 mm drill pin	<b>AR-2268</b>
Pec Button, 2.6 mm × 10.9 mm <b>(a)</b>	<b>AR-2266</b>
Button Inserter	<b>AR-2262</b>
3.2 mm Drill, sterile	<b>AR-2263</b>
Spear w/ Circumferential Teeth w/ Obturator	<b>AR-1906</b>
#2 FiberWire Suture, 38 in (1 blue, 1 black/white)	<b>AR-7201</b>
<b>Pec Button, Larger Eyelet Repair Kit</b> Includes 3 large pec buttons w/ attached inserter, three 17 in FiberTape sutures w/ needles, three 38 in #5 FiberWire suture w/ needles, and 3.7 mm drill pin	<b>AR-2269</b>
Large Pec Button w/ Inserter, 3.2 mm × 10.9 mm, larger eyelets <b>(b)</b>	<b>AR-2267</b>
3.7 mm Drill	<b>AR-2272</b>
FiberTape Suture, 2 mm, 17 in (blue), each end tapered to #2 FiberWire suture w/ tapered needle, 26.5 mm, ½ circle	<b>AR-7237-17N</b>

## SwiveLock® Tenodesis Implants

The family of SwiveLock tenodesis implants has been designed to support a multitude of proximal biceps tenodesis techniques and maximize OR efficiency. Implants are available with suture eyelets or closed eyelets for surgeons who prefer a whipstitching technique, and forked eyelet versions are offered for an all-arthroscopic approach.

# Elbow Arthroscopy

Elbow Arthroscopy Set .....	<b>64</b>
Elbow Ulnar Collateral Ligament (UCL) Reconstruction Set .....	<b>65</b>

## Elbow Arthroscopy Set

The Elbow Arthroscopy Instrument Set is the first and only comprehensive set of instruments available for elbow arthroscopy. Precision manufactured to the highest-quality standards and thoughtfully designed around the feedback of leading elbow arthroscopists, the set enables improved portal placement and includes unique instruments designed for tissue retraction/ elevation, microfracture, precise soft-tissue resection with arthroscopic scissors and punches, loose body graspers, osteotomes, and curettes. The previously unreachable and unfixable can now be addressed, opening up new horizons in patient care for elbow pathology.

## Elbow Ulnar Collateral Ligament (UCL) Reconstruction Set

This set includes all the instrumentation needed to perform elbow UCL reconstructions and accommodates the modified Jobe, docking, and DANE TJ techniques in addition to techniques using tenodesis screws or button fixation. This set's guided instruments, drills, and reamers allows precise placement of bone tunnels and sockets in the ulna and humeral epicondyle. The recommended disposable kits provide novel instruments to easily pass sutures through the prepared bone tunnels and sockets, making graft passage quick and easy.

Product Description	Item Number
<b>Elbow UCL Reconstruction Set (a) includes</b>	<b>AR-7700S</b>
Drill, 4.5 mm, cannulated	AR-1204.5L
Drill, 4 mm, cannulated	AR-1204L
Drill, 5 mm, cannulated	AR-1205L
UCL Humeral Tunnel Guide Sleeve, 5 mm × 15 mm <b>(b)</b>	AR-7710

## Low-Profile AC Implant

The Low-Profile AC implant and Dog Bone™ button combine to form a strong, low-profile device optimized for the stabilization of acute AC joint separations. This dual construct features two independent tensionable TightRope sutures preassembled into a clavicle insert and a Dog Bone button that attaches separately to the suture loops after they are passed antegrade through the 3 mm bone tunnels.

Product Description	Item Number
<b>Low-Profile AC Implant Kit</b> Includes knotless AC implant, Dog Bone button, 3 mm drill, SutureLasso™ SD wire loop, and 5.1 mm cannulated reamer	<b>AR-2371</b>

Low-Profile AC Repair System	<b>LT1-00059-EN</b>

## Dog Bone™ Button

The precontoured, titanium Dog Bone button allows the use of knotless TightRope® technology or multiple FiberTape® sutures for AC joint reduction. The buttons are attached to the Knotless TightRope® implant or FiberTape sutures independently, only suture material will be passed through the clavicle and coracoid tunnels, allowing the repair to be completed through smaller tunnels.

Product Description	Item Number
<b>Acute AC Repair Kit</b> Includes Dog Bone button preloaded onto FiberTape and TigerTape™ Loops, free Dog Bone button, 3 mm cannulated drill, and nitinol suture-passing wire	<b>AR-2271</b>

## AC TightRope® Implant

This implant allows surgeons to easily reconstruct acute AC joint separations in a minimally invasive manner, either open or arthroscopic, using a 4-strand continuous loop of #5 FiberWire® suture interlaced between 2 titanium buttons.

Product Description	Item Number
<b>AC TightRope Repair Kit</b> Includes AC TightRope implant, suture-passing wire, and knot pusher	<b>AR-2257</b>
<b>Required Instruments</b>	
AC Joint Reconstruction Master Set	<b>AR-2255MS</b>
<b>Required Disposables</b>	
2.4 mm Drill-Tip Guide Pin	<b>AR-1250L</b>
<b>Optional Disposables</b>	
SutureLasso™ SD Wire Loop, 5/box	<b>AR-4068-05SD</b>
Button Inserter	<b>AR-2262</b>

## AC InternalBrace™ Ligament Augmentation Repair

*InternalBrace* ligament augmentation repair combined with CC ligament fixation may help limit posterior displacement of the clavicle. A 5 mm offset guide can help drill the acromion and clavicle anteriorly. The guide accepts both the existing 3.5 mm and 4.75 mm SwiveLock® drills.

Product Description	Item Number
5 mm Offset Guide for AC <i>InternalBrace</i> Ligament Augmentation Repair <b>(a)</b>	<b>AR-2276-05</b>
Twist Drill for 4.75 mm SwiveLock Anchor <b>(b)</b>	<b>AR-2276D</b>
Drill for 3.5 mm SwiveLock Anchor, sterile	<b>AR-2325D-ST</b>
BioComposite SwiveLock C Anchor, 4.75 mm × 19.1 mm	<b>AR-2324BCC</b>
BioComposite SwiveLock Anchor, 3.5 mm × 15.8 mm	<b>AR-2325BCC</b>
FiberTape® Suture, 2 mm, 7 in (blue), each end tapered to #2 FiberWire® suture	<b>AR-7237-7</b>

The *InternalBrace* surgical technique is intended only to augment the primary repair/reconstruction by expanding the area of tissue approximation during the healing period and is not intended as a replacement for the native ligament. The *InternalBrace* technique is for use during soft tissue-to-bone fixation procedures and is not cleared for bone-to-bone fixation.

## Twin Tail TightRope® Implant

This implant features 2 independent clavicle button tails and is designed to help reduce and stabilize the AC joint for open, acute AC injuries.

Product Description	Item Number
Twin Tail TightRope	<b>AR-2264</b>
<b>Required Instruments</b>	
Drill-Tip Guide Pin, 2.4 mm	<b>AR-1250L</b>
Cannulated Drill, 4.5 mm	<b>AR-1204.5L</b>
Cannulated Long Drill, 4 mm	<b>AR-1204LX</b>
Button Inserter	<b>AR-2262</b>
SutureLasso SD Suture Passer, crescent <b>or</b>	<b>AR-4068C</b>
Micro SutureLasso™ Suture Passer, minor bend	<b>AR-8701</b>
<b>Optional Instruments</b>	
Guide Pin Sleeve	<b>AR-2255CG-02</b>

## Adjustable AC Guides

The adjustable AC guides give surgeons the ability to arthroscopically hook or rest the tip of the guide on the medial side of the coracoid, as well as independently adjust the guide medially and laterally on the clavicle.

Product Description	Item Number
AC Target Guide, left	AR-2253L
AC Target Guide, right	AR-2253R
AC Drill Guide Assembly	AR-2273
ACL Guide Frame Handle Assembly	AR-1510H
Drill Sleeve, 3 mm	AR-2255CG-05

## Coracoid Passing Instruments

The AC wire passer and flexible obturator allow surgeons to arthroscopically pass a graft around the coracoid to address chronic AC injuries. This system is intended to be used in conjunction with mechanical reduction and fixation of the CC ligaments, particularly with Dog Bone™ buttons and FiberTape® sutures. The coracoid passer is designed to fit through a small incision on the clavicle and curve around the coracoid, allowing the surgeon to pass a FiberStick™ suture through the cannulation and retrieve it on the lateral side of the coracoid. The flexible obturator is designed to shuttle around the coracoid and dilate the soft tissue prior to passing an allograft or autograft.

Product Description	Item Number
AC Wire Passer	AR-2252
Flexible Obturator	AR-2275

## AC Joint Master Set

The Acromioclavicular Joint Reconstruction System contains the instrumentation necessary to complete the acute and chronic AC joint repair techniques.

Product Description	Item Number
<b>AC Joint Reconstruction System includes</b>	<b>AR-2255MS</b>
Cannulated Drill, 4 mm	AR-1204L
Cannulated Drill, 4.5 mm	AR-1204.5L
Cannulated Headed Reamer, 5 mm	AR-1405
Cannulated Headed Reamer, 5.5 mm	AR-1405.5
Cannulated Headed Reamer, 6 mm	AR-1406
Cannulated Headed Reamer, 6.5 mm	AR-1406.5
ACL Guide Frame Handle Assembly	AR-1510H

AC Guide, right	AR-2254R
Guide Pin Sleeve, 2.4 mm	AR-2255CG-02
Clavicle Drill Positioner	AR-2255CG-03
Drill Stop	AR-2255CG-04
Drill Sleeve, 3 mm	AR-2255CG-05
AC Tenodesis Screw Driver	AR-2255D
Coracoid Graft Passer, left	AR-2256L
Coracoid Graft Passer, right	AR-2256R
AC GraftRope Graft Sizer	AR-2265
Forked Probe	AR-6002
AC Joint Instrumentation Case	AR-2255MC
<b>Optional</b>	
Guide Arm, left	AR-2253L
Guide Arm, right	AR-2253R
AC Drill Guide Assembly	AR-2273

## Open Chronic AC Joint Reconstruction

This system enables surgeons to reconstruct chronic AC joint separations anatomically using a tendon graft with backup mechanical fixation. The technique uses 5.5 mm × 8 mm PEEK tenodesis screws to achieve strong graft fixation in the clavicle and allows surgeons to recreate the conoid and trapezoid coracoclavicular ligament bundles. The graft is protected during the healing process by using a strand of FiberWire® suture as backup mechanical fixation.

Product Description	Item Number
PEEK Tenodesis Screw, 5.5 mm × 8 mm	AR-1655PS
<b>Required</b>	
AC Joint Reconstruction Master Set	AR-2255MS
<b>Disposables</b>	
SutureLasso™ SD Wire Loop, 5/box	AR-4068-05SD
#2 FiberWire Suture, 38 in w/ tapered needle	AR-7200
#2 FiberWire Suture, 38 in	AR-7233
<b>Optional</b>	
Bio-Tenodesis Tap, 5.5 mm × 15 mm	AR-1555T
Tear-Drop Handle (required w/ tap)	AR-2001
Nitinol Guide Pin, 1.1 mm, 6/box	AR-1249
Bio-Tenodesis Disposable Kit, sterile, 5/box	AR-1676DS

# Glenoid Bone Loss

Glenoid Bone Loss Set.....	74
Distal Tibia Allograft Workstation.....	75

## Glenoid Bone Loss Set

The Glenoid Bone Loss Set helps surgeons address the complexity of shoulder instability caused by bony pathology such as anterior glenoid bone loss, bony Bankart lesions, glenoid fractures, and engaging Hill-Sachs lesions.

### 3.75 mm Cannulated Titanium Screws

- Partially and fully threaded options
- Self-drilling and self-tapping
- Cannulated shaft accepts 1.6 mm guide pins
- Lengths in 2 mm increments (26 mm to 42 mm)
- Low-profile head
- Standard 2.5 mm hexagonal drive
- Cancellous thread profile

### Open Latarjet Instruments

This unique instrumentation helps make the Latarjet technique more consistent and reproducible.

- Osteotome blade with blade shield for coracoid graft retrieval
- Retractors to ease exposure
- Coracoid-grasping drill guide helps control and prepare graft
- Glenoid offset guide holds graft in position on the glenoid, while firmly fixed in place

### Bony Bankart/Glenoid Fracture Instruments

These instruments have been designed to allow placement of the partially threaded 3.75 mm cannulated screws, either percutaneously or through a standard arthroscopic cannula.

- Long nesting guide sleeves
- Long, 2.75 mm cannulated drill
- Long, 2.5 mm hexagonal driver

FiberTape® Cerclage System .....	78
FiberTape® Sternal Closure .....	79
Clavicle Plate and Screw System .....	80

## FiberTape® Cerclage System

The FiberTape cerclage system consists of specially designed FiberTape sutures, passing needles, passing hooks, and a tensioner. The system is designed to replace standard cable and wire systems commonly used in upper and lower extremity trauma, arthroplasty, and sternal closure indications.

- 100% radiolucent – no radiographic interference from cerclage
- No concerns of metal mismatch with adjacent implants
- No sharp ends or broken wires to potentially harm the patient or medical staff
- No metal debris migration or concerns of metallosis

Product Description	Item Number
FiberTape Cerclage (blue), w/ TigerLink suture shuttle and loader	AR-7268

## FiberTape® Sternal Closure

The FiberTape sternal closure system is a 100% nonmetallic, suture-based alternative to metal wires traditionally used to close the sternum after cardiac surgery. The FiberTape sternal closure implant, which is implanted similarly to metal wires, provides strong, reproducible compression<sup>1</sup> that helps support sternal approximation and stabilization.

Product Description	Item Number

## TRIMANO® FORTIS Support Arm

The TRIMANO FORTIS support arm acts as the surgical team's "third hand" by securely and safely holding the patient's arm in any desired position during arthroscopic or open shoulder surgery performed in the beach chair position. The compact and lightweight device is easily attached to any OR table Clark rail and is ready for immediate use. No additional power or air connections are required. The patient's arm can be moved in any direction by simply pressing the support arm handle. Releasing the handle locks it into the desired position. The convenient TRIMANO Beach Chair Kit includes a sterile drape for the support arm, an ergonomically designed foam arm holder and Coban™ self-adherent wrap, and allows for quick and easy patient preparation, while gently protecting the operative arm.

Product Description	Item Number
TRIMANO FORTIS Support Arm <b>(a)</b>	AR-1740
TRIMANO FORTIS Adapter <b>(b)</b>	AR-1741
TRIMANO Beach Chair Kit, 6/box <b>(c)</b>	AR-1644
TRIMANO Elbow Kit, 6/box <b>(d)</b>	AR-1646
TRIMANO Drape, 10/box	AR-1648
TRIMANO Wrist Positioner	AR-1647
TRIMANO FORTIS Leg Holder, reusable	AR-1747-B
TRIMANO FORTIS Knee Kit, 6/box	AR-1747

Coban is a registered trademark of 3M.

## Beach Chair Positioner

The “Lift-Assist” Beach Chair Positioner System allows unobstructed posterior access and makes repositioning the patient quick and easy. The free-sliding head positioner feature protects the patient’s neck when raising and lowering the table and the fold-away shoulder wings remove completely for unobstructed shear-free access to the operative shoulder. The lift-assist design enables nearly effortless positioning as the piston supports most of the patient’s weight.

Product Description	Item Number
<b>“Lift-Assist” Beach Chair Positioner</b> Includes reusable pad set, intubation pad and plate, beach chair clamps <b>(2)</b> , and reusable security strap <b>(a)</b>	AR-1627
<b>Required</b>	
LPS Arm Support, required <b>(d)</b>	AR-1627-01
Counter Traction Strap, required <b>(e)</b>	AR-1627-03
Easy Lock Socket, 2 required <b>(d)</b>	AR-1627-12
Universal Head Positioner w/ Handles, required	AR-1627-05
Universal Head Positioner w/o Handles <b>(b)</b>	AR-1627-20
Head Positioner Disposable Kit, 10/box, required <b>(c)</b>	AR-1627-06
Beach Chair Cart, recommended	AR-1627-13
<b>Replacement</b>	
Reusable Pad Set (Replacement)	AR-1627-09
Intubation Pad and Plate (Replacement)	AR-1627-10
Beach Chair Rail Clamp US Replacement, qty 1	AR-1627-11
Reusable Security Strap for AR-1627-01 (Replacement)	AR-1627-15
UHP Velcro Strap (Replacement), qty 1	AR-1627-17

## Shoulder Suspension System (S3)

The Arthrex Shoulder Suspension System for lateral decubitus position combines simple and intuitive functionality, providing the surgeon with optimum arthroscopic visualization for all shoulder pathology. The tower is lightweight and folds into a small vertical footprint for easy storage and setup by the clinical staff. Intraoperative control of abduction, internal/external rotation, and lateral distraction can be easily performed in a sterile fashion, allowing for the utmost in direct control.

Product Description	Item Number
Shoulder Suspension System (S3)	AR-1650S
Shoulder Suspension Tower (a)	AR-1650-01
Arm Sleeve Connector, S3 (b)	AR-1650-02
Lateral Traction Sling Connector, S3 (c)	AR-1650-03
Weight Hanger, 10 lb (4.5 kg), S3 (f)	AR-1650-04
Weight, 2.5 lb (1.1 kg) (g)	AR-1650-05
Storage Cart, S3 (h)	AR-1650-06
US Clamp, S3	AR-1650-07
Arm Sleeve Disposable, S3, qty 6 (d)	AR-1651
Lateral Traction Sling Disposable, S3, qty 6 (e)	AR-1652

### 3-Point Shoulder Distraction System

This versatile system provides safe, effective, and easy positioning of the shoulder during all types of arthroscopic or open shoulder surgery performed in the lateral decubitus position.

Product Description	Item Number
3-Point Shoulder Distraction System	AR-1600M

### Arm Sleeves

The lateral traction arm sleeve provides a simple, economical “roll-down” solution for traction in the lateral decubitus position.

The STaR Sleeve™ arm holder is a soft foam traction boot designed to gently cradle the arm, forearm, and wrist during distal distraction in any desired position of abduction.

Product Description	Item Number
Lateral Traction Arm Sleeve, sterile, qty 5 <b>(a)</b>	AR-1635
STaR Sleeve, compact, Coban, sterile, qty 6 <b>(b)</b>	AR-1606C
STaR Sleeve, Coban, sterile, qty 6	AR-1606
STaR Sleeve, velcro, sterile, qty 6	AR-1606V
STaR Sleeve, velcro, extra long, sterile, qty 6	AR-1606LV
STaR Sleeve, velcro, small, sterile, qty 6	AR-1606SV
Cushioned Lateral Traction Sling for Instability, qty 6	AR-1603
Atraumatic Hand Holder Traction Attachment	AR-1602D

### Lateral Decubitus Shoulder Traction Tower

This traction tower features a single boom arm that allows for abduction, forward flexion, and traction during open and arthroscopic procedures.

Product Description	Item Number
Lateral Decubitus Shoulder Traction Tower	AR-1630

### Accessory Items for Limb Positioners

Product Description	Item Number
Optional Accessories	
Traction Scale Attachment <b>(a)</b>	AR-1604
Weight Hanger, 10 lb (4.5 kg) <b>(b)</b>	AR-1650-04
Weight, 2.5 lb (1.1 kg) <b>(c)</b>	AR-1650-05
Storage Hook and Wall Mount	AR-1605S
Storage Stand for Limb Positioners <b>(d)</b>	AR-1600SS
Replacement Parts	
White Plastic Pulley Wheel	AR-16000602
Pulley Post Assembly for AR-16000602	AR-16000510
Lateral Traction Hub and Handle for AR-1600M	AR-16001400
Handle for AR-1600M Lateral Traction Hub	AR-16001408
Extension Arm Elevation Shaft Cap	AR-16001607
Small Black Knob for AR-1600M	AR-1600A-01
Base and Small Knobs Assembly for AR-1600M	AR-16001500
Base Assembly 5/16-18 Screw for AR-16001500	AR-16110407
Large Black Knob	AR-1600A-02
Swivel Lock Base for Large Knob Assembly for AR-1600M	AR-16001200

## Knotless Tensionable Anchor Chart

Knotless FiberTak®	Dimensions	Anchor	Material	Suture	Item Number
	N/A	Knotless 1.8 FiberTak Gen2	Suture	#2 suture	AR-3636
	N/A	Knotless 1.8 FiberTak	Suture	#2 suture	AR-3638
	N/A	Knotless 2.6 FiberTak	Suture	#5 suture	AR-3641
	N/A	Self-Punching Knotless 2.6 FiberTak	Suture	w/ #5 suture	AR-3641SP
	N/A	Self-Punching Knotless 2.6 FiberTak RC	Suture	w/ 1.7 mm TigerTape™ Loop (wht/blk) and #2 suture (blu)	AR-3653SP
	N/A	Self-Punching Knotless 2.6 FiberTak RC	Suture	w/ 1.7 mm FiberTape® Loop (blu) and #2 suture (wht/blk)	AR-3653TSP
	N/A	Self-Punching Knotless 2.6 FiberTak RC	Suture	w/ 1.7 mm FiberTape Loop (blk/blu) and #2 suture (blu/blk)	AR-3653-TTSP
Knotless SutureTak®	Dimensions	Anchor	Material	Suture	Item Number
	3 mm × 12.7 mm	Knotless SutureTak	β-TCP	w/ #2 suture	AR-1938BC
	3 mm × 12.7 mm	Knotless SutureTak	PEEK	w/ #2 suture	AR-1938PS
Knotless Corkscrew®	Dimensions	Anchor	Material	Suture	Item Number
	3.9 mm × 11.2 mm	Knotless Corkscrew	β-TCP	w/ #5 FiberWire® CL	AR-1941BC
	3.9 mm × 11.2 mm	Knotless Corkscrew	PEEK	w/ #5 FiberWire CL	AR-1941PSV
	4.75 mm × 14 mm	Knotless Corkscrew	β-TCP	w/ #5 Suture	AR-1927KBC
	4.75 mm × 14 mm	Knotless Corkscrew	PEEK	w/ #5 Suture	AR-1927KPS
Knotless SwiveLock®	Dimensions	Anchor	Material	Suture	Item Number
	4.75 mm × 19.1 mm	Knotless SwiveLock C	β-TCP	w/ #2 suture (blu) and SutureTape Link (wht/blu)	AR-2324KBCC
	4.75 mm × 19.1 mm	Knotless SwiveLock C	β-TCP	w/ FiberTape Loop (blu), #2 suture (wht/blk), SutureTape Link (wht/blu)	AR-2324KBCTT
	4.75 mm × 19.1 mm	Knotless SwiveLock C	β-TCP	w/ TigerTape Loop (wht/blk), #2 suture (blu), and SutureTape Link (wht/blk)	AR-2324KBCTT
	4.75 mm × 19.1 mm	Knotless SwiveLock C	PEEK	w/ #2 suture (blu) and SutureTape Link (wht/blk)	AR-2324KPSLC
	4.75 mm × 19.1 mm	Knotless SwiveLock C	PEEK	w/ FiberTape Loop (blu), #2 suture (wht), SutureTape Link (wht/blu)	AR-2324KPCT
	4.75 mm × 19.1 mm	Knotless SwiveLock C	PEEK	w/ TigerTape Loop (wht/blk), #2 suture (blu), and SutureTape Link (wht/blk)	AR-2324KPCTT
	5.5 mm × 19.1 mm	Knotless SwiveLock C	β-TCP	w/ #2 suture (blu) and SutureTape Link (wht/blu)	AR-2323KBCC
	5.5 mm × 19.1 mm	Knotless SwiveLock C	PEEK	w/ #2 suture (blu) and SutureTape Link (wht/blk)	AR-2323KPSLC

## Soft Anchors

For Glenoid Repair	Anchor	Suture	Item Number
	FiberTak®	w/ #2 suture	AR-3600
	FiberTak	w/ two #2 sutures	AR-3600-2
	FiberTak	w/ 1.3 mm SutureTape	AR-3602
	FiberTak	w/ two 1.3 mm SutureTape	AR-3602-2
	FiberTak	w/ #2 TigerTail®	AR-3603
	FiberTak	w/ two #2 TigerTail	AR-3603-2
	Knotless 1.8 FiberTak Gen 2	w/ #2 suture	AR-3636
	Kntoless 1.8 FiberTak	w/ #2 suture	AR-3638
For Rotator Cuff Repair	Anchor	Suture	Item Number
	Self-Punching 2.6 FiberTak RC	w/ 1.7 mm TigerTape™ Loop (wht/blk) and 1.3 mm SutureTape (wht/blu)	AR-3652SP
	Self-Punching 2.6 FiberTak RC	w/ 1.7 mm FiberTape® Loop (blu) and 1.3 mm SutureTape (wht/blk)	AR-3652TSP
	Self-Punching 2.6 FiberTak RC	w/ 1.7 mm FiberTape Loop (blk/blu) and 1.3 mm SutureTape (blu)	AR-3652TTSP
	Self-Punching <b>Knotless</b> 2.6 FiberTak RC	1.7mm TigerTape Loop (wht/blk) and #2 suture (blu)	AR-3653SP
	Self-Punching <b>Knotless</b> 2.6 FiberTak RC	1.7 mm FiberTape Loop (blu) and #2 suture (wht/blk)	AR-3653TSP
	Self-Punching <b>Knotless</b> 2.6 FiberTak RC	1.7 mm FiberTape Loop (blu/blk) and #2 suture (blk/blu)	AR-3653TTSP
	<b>Knotless</b> 2.6 FiberTak	w/ #5 suture	AR-3641
	Self-Punching <b>Knotless</b> 2.6 FiberTak	w/ #5 suture	AR-3641SP
	2.6 FiberTak	w/ two 1.3 mm SutureTapes (wht/blu, wht/blk)	AR-3632
	Self-Punching 2.6 FiberTak	w/ two 1.3 mm SutureTapes (wht/blu, wht/blk)	AR-3632SP
	2.6 FiberTak	w/ three 1.3 mm SutureTapes (wht, wht/blu, wht/blk)	AR-3633
	Self-Punching 2.6 FiberTak	w/ three 1.3 mm SutureTapes (wht/blu, blk/wht, blu)	AR-3633SP
	2.6 FiberTak	w/ two #2 FiberWire CL (wht/blu, wht/blk)	AR-3630-1
	2.6 FiberTak	w/ three #2 FiberWire CL (wht/blu, wht/blk, wht)	AR-3631-1

This description of technique is provided as an educational tool and clinical aid to assist properly licensed medical professionals in the usage of specific Arthrex products. As part of this professional usage, the medical professional must use their professional judgment in making any final determinations in product usage and technique. In doing so, the medical professional should rely on their own training and experience and should conduct a thorough review of pertinent medical literature and the product's directions for use. Postoperative management is patient-specific and dependent on the treating professional's assessment. Individual results will vary and not all patients will experience the same postoperative activity level or outcomes.
